FOUNDATIONAL INITIATIVES & SYSTEMS MOMENTUM

*Opportunity for Redesign in
our Commonwealth*

Behavioral Health in the Commonwealth of Virginia

Opportunity for Redesign

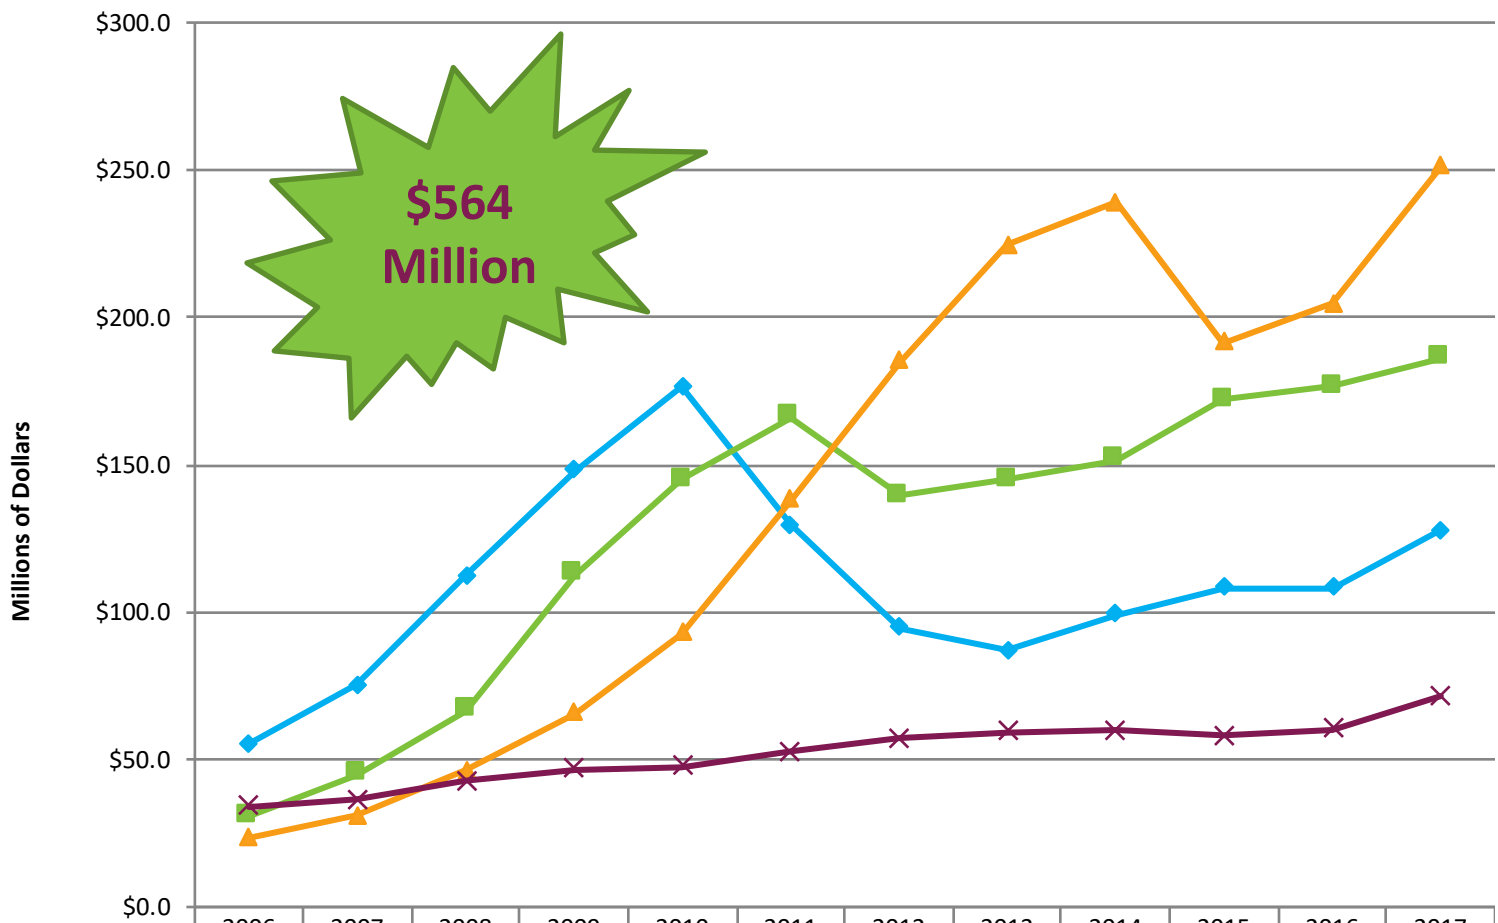

Medicaid is the largest payer of behavioral health services in Virginia

of Medicaid members had either a primary or secondary behavioral health diagnoses

Medicaid Expenditures on Community-Based Medicaid Mental Health Services

\$564 Million

	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017
Intensive In-Home	\$55.4	\$75.2	\$112.1	\$148.0	\$176.5	\$129.3	\$94.4	\$87.1	\$99.3	\$108.3	\$108.3	\$127.6
Therapeutic Day Treatment	\$30.8	\$45.0	\$66.8	\$112.7	\$144.9	\$166.1	\$139.2	\$144.9	\$151.6	\$171.8	\$176.5	\$186.0
Mental Health Skill Building	\$23.4	\$30.7	\$46.4	\$65.8	\$92.6	\$138.2	\$185.3	\$224.5	\$239.1	\$191.4	\$204.6	\$251.0
Other Behavioral Health Services	\$33.9	\$36.2	\$42.8	\$46.5	\$47.4	\$52.4	\$57.3	\$59.6	\$59.9	\$58.1	\$60.0	\$71.5

Foundational Initiatives:

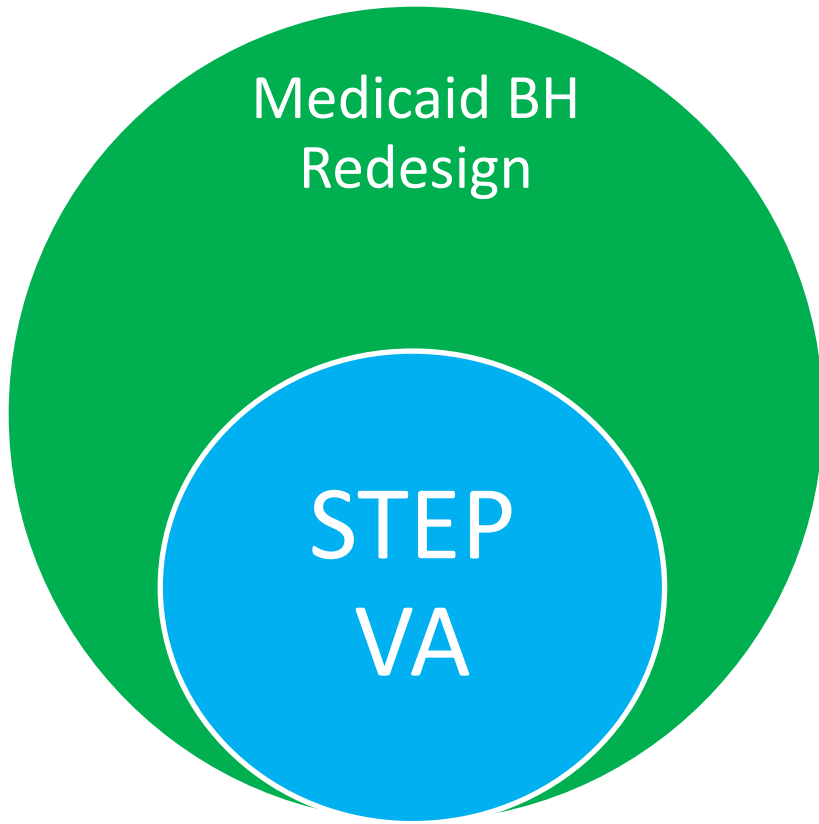

Momentum for Redesign

STEP Virginia

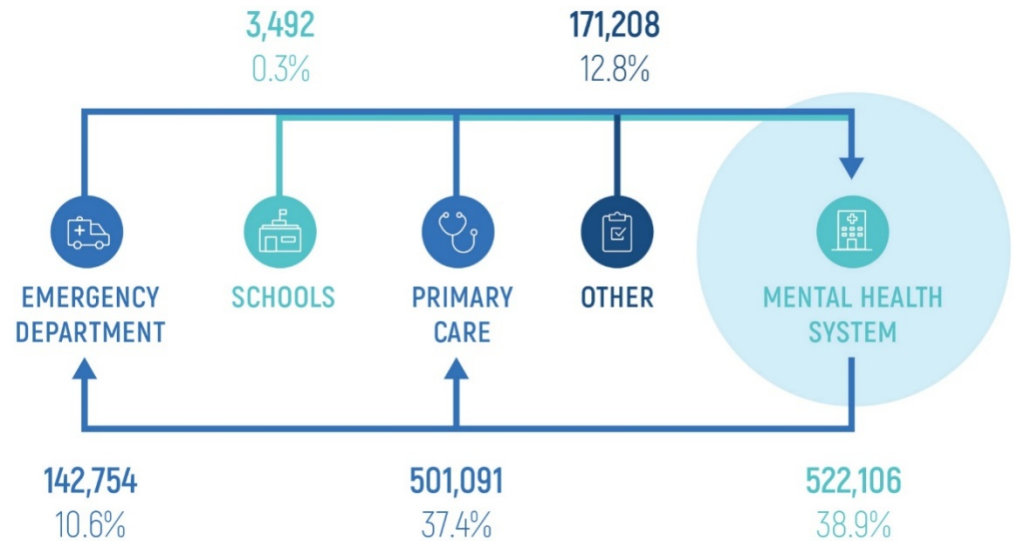

- STEP-VA services will improve access, increase quality, build consistency and strengthen accountability across Virginia's public behavioral health system.
- A strong public behavioral health system provides a necessary foundation

STEP-VA & Medicaid BH Redesign

- When STEP VA is fully implemented, the public mental health system will have achieved accessibility, consistency, quality and accountability as a necessary foundational support for behavioral health services.
- Medicaid Behavioral Health Redesign will provide the network of support for STEP VA for long term sustainability to ensure access to essential services is met.

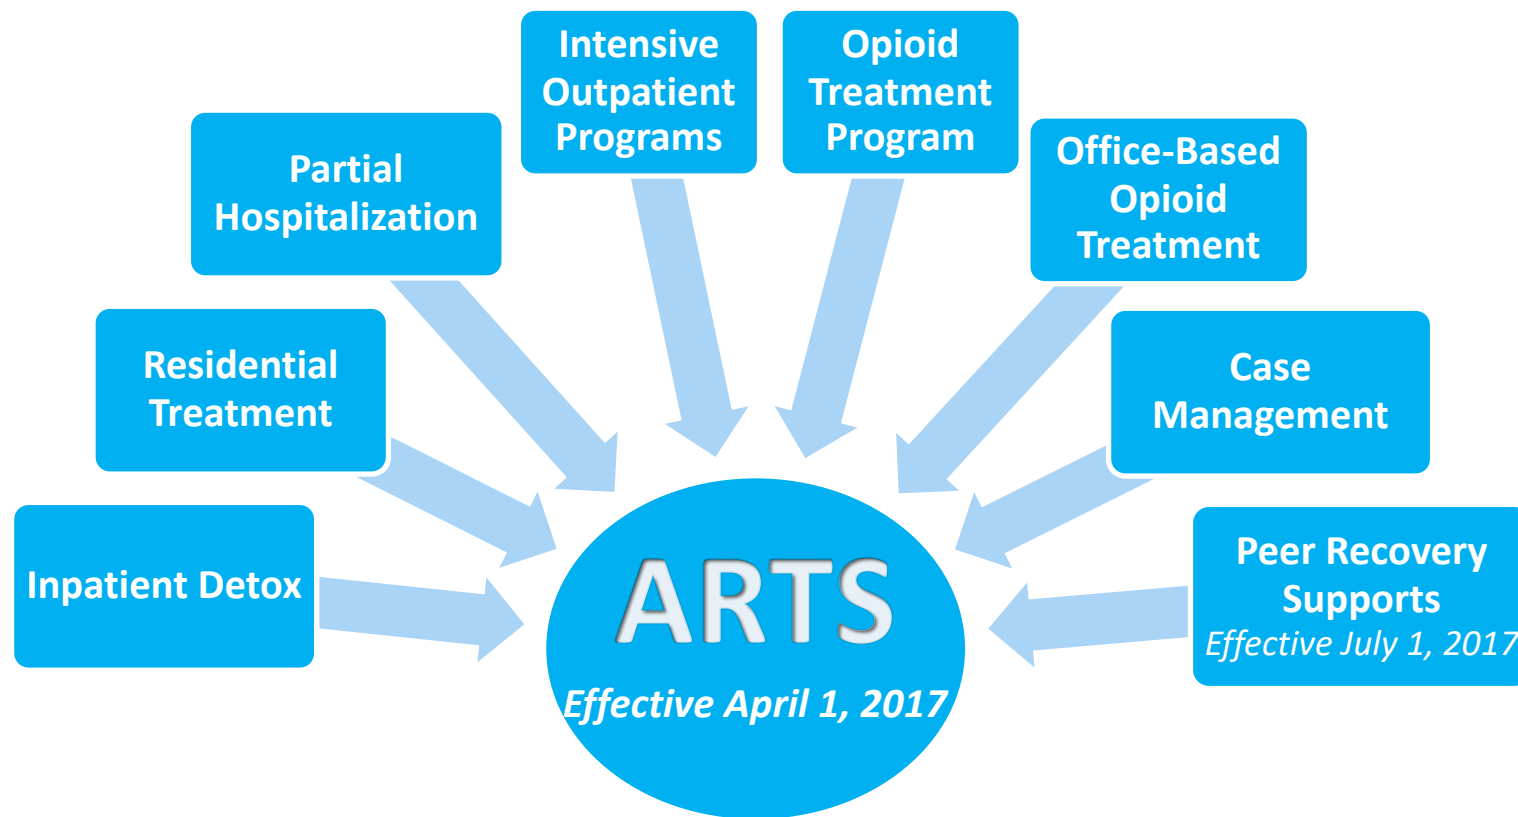

- STEP VA meets the essential needs of individuals through the public mental health system.
- The remaining proportion of mental health needs will be met through the system redesign.
- Both transformative efforts provide and enhance services through the continuum meeting the needs of all populations.

Addiction and Recovery Treatment Services (ARTS)

Transformation of the Delivery System of Medicaid SUD Services

- Transformed the Medicaid benefit and services using national American Society of Addiction Medicine criteria
- Increased Medicaid reimbursement for evidence-based treatment

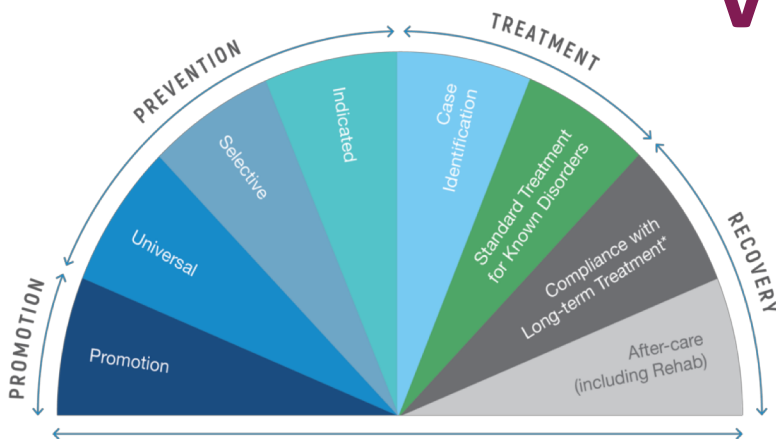

ARTS is carved into Managed Care plans to create a fully integrated physical and behavioral health continuum of care

Further Momentum for Redesign

- Family First Prevention Act Implementation
- Governor's Cabinet focus on Trauma Informed Care
- Department of Juvenile Justice Transformation
- Medicaid Expansion
- SJ 47 Deeds Commission

VISION AND PARTNERSHIP

Implementing the evidence base in community mental health

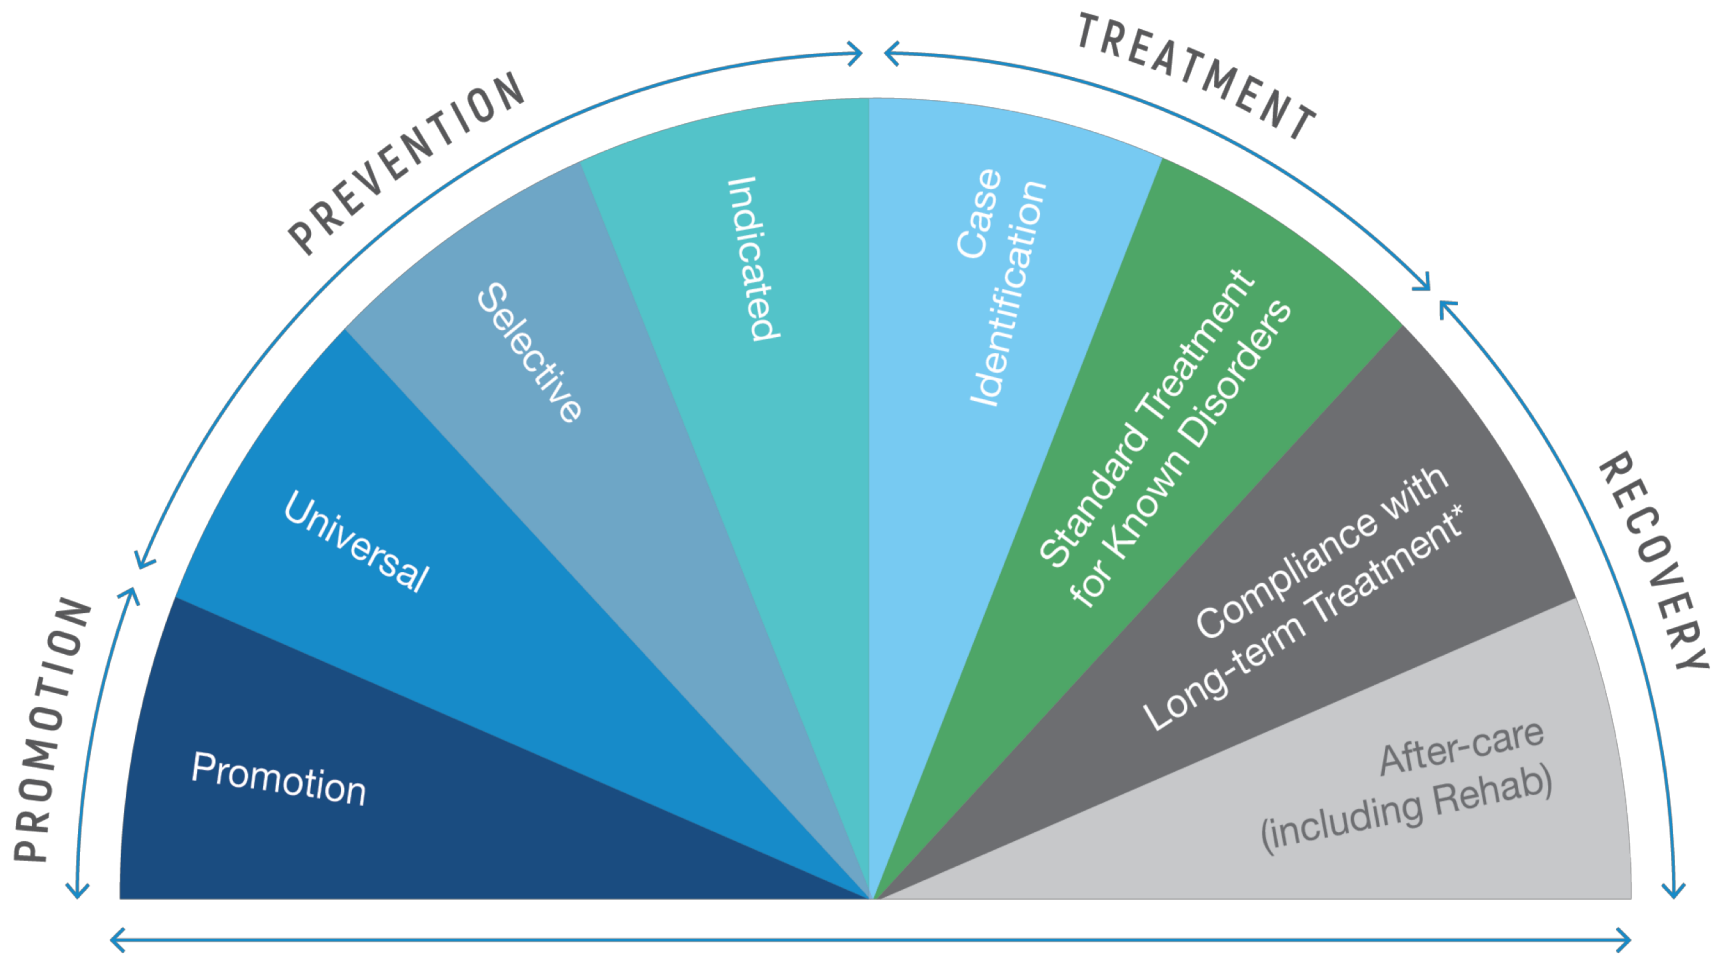

Our Vision of Redesign:

A comprehensive spectrum of behavioral health services

- In collaboration with stakeholders' clinical input, our goal is to develop recommendations for a comprehensive system redesign plan for Medicaid behavioral health services
- Our vision for this system:
 - Improved behavioral health outcomes for members
 - A shift in our collective energies
 - Manifestation of trauma-informed principles across member, provider, and system
 - Reflective of the evidence for what works in community mental health
 - Mindful of the evolving needs for members across the lifespan

Our Vision of Redesign: A full spectrum of behavioral health services

SAMHSA Continuum of Care; adapted from Institute of Medicine. *Reducing risks for mental disorders: Frontiers for preventative intervention research*. Washington, DC: National Academies Press.

*Goal: Reduction in relapse and recurrence

Farley Health Policy Center: University of Colorado Medical School

Conduct, analyze, and disseminate research to inform policy development and implementation

Provide technical, adaptive, and leadership assistance for integrating care across health and health systems

Convene stakeholders and decision makers to improve health and healthcare together

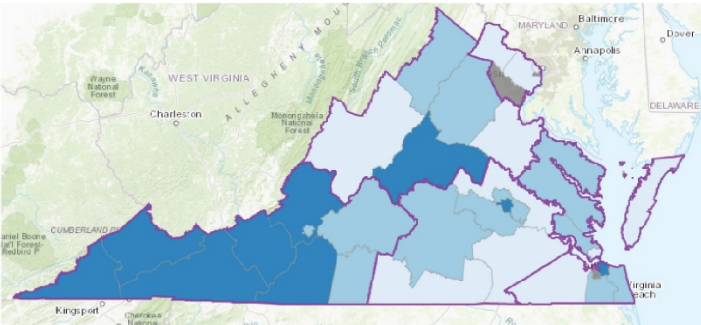

Partner with communities, state and federal agencies, and foundations to catalyze action

Synthesize and apply evidence to policy to bridge the gap between what we know and what we do

Farley Center's work in Virginia: Key findings

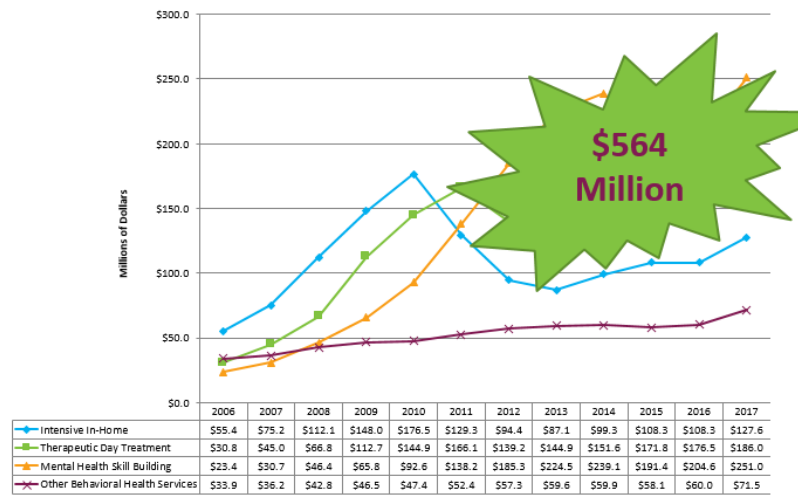

In FY17, 28% of Medicaid members had either primary or secondary behavioral health diagnoses

% of Adults Reporting Poor Mental Health, LHD - 2015

- > 31.6 - 39
- 10.8 - 28.6
- > 28.6 - 31.6
- Not Available

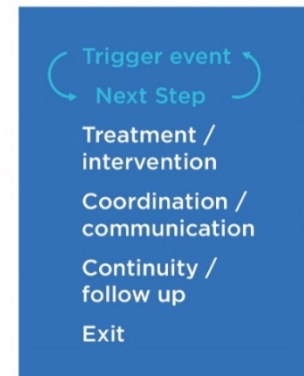

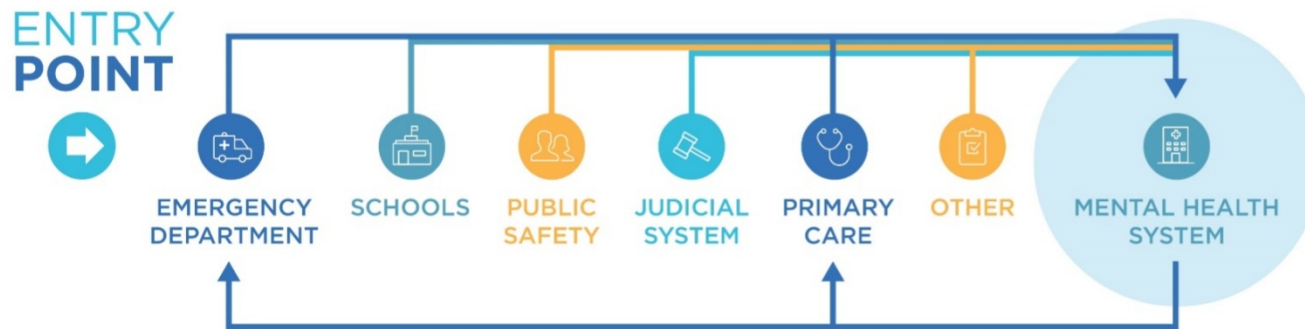

Medicaid members with behavioral health diagnoses had **1.34+ million visits** across multiple care settings

Farley Center's work in Virginia: *Recommendations*

- **Alignment:** regional and agency strategies
- **Accountability:** connect measures for high quality services to resource allocation
- **Access:** recognize all points of entry to support a continuum of care from prevention to treatment and recovery

Process & Contributions

1. Review best practices for Medicaid mental health services across the lifespan from research literature and state case studies
2. Analyze service gaps for the Virginia Medicaid population
3. Enlist stakeholders' input throughout process to shape recommendations for a continuum of care and next steps
4. Develop recommendations for a continuum of evidence-based, trauma-informed, and preventive-focused Medicaid community mental health services
5. Identify individual and population level metrics and quality outcomes
6. Assess DBHDS licensing and regulations to ensure quality and accountability

Anticipated Outcomes

- Alignment:
 - Recommendations to align Medicaid behavioral health services with DBHDS licenses to create a continuum of evidence-based, trauma-informed, prevention-focused and cost-effective service options for members across the lifespan
- Accountability
 - Recommendations on outcome measures that incentivize high quality services in least restrictive environments
- Access
 - Recommendations to expand access through a “no wrong door” approach for members across a full array of services delivered in settings where they naturally present for support.
 - Recommendations to expand access to service types and therapeutic interventions that are best practices and well-matched to members’ level of impairment / support need.

An Example of Filling the Gap: Integrated Physical & Behavioral Health Care

Oregon Coordinated Care Organizations

- In 2012, Oregon transformed its Medicaid program through an innovative 1115 waiver with CMS
 - \$1.9 billion up front to reduce spending by 2% without diminished quality
- 6 years into implementation, there are 15 CCOs

Coverage up 65%
Improved access
Improved satisfaction

ED Visits down 22%
Significant reduction in
admissions for chronic
disease

Behavioral Health Redesign Workgroup

Stakeholder Categories

- Member Advocacy Groups
- Provider Associations
- Professional Organizations
 - by discipline area
- Managed Care Organizations
- State Agencies

Purpose of the Workgroup

- To establish a venue for open communication regarding systems redesign
- To strengthen our collective, collaborative partnership as these will be central to the success of redesign
- To share information on our current work and intentions over the coming months

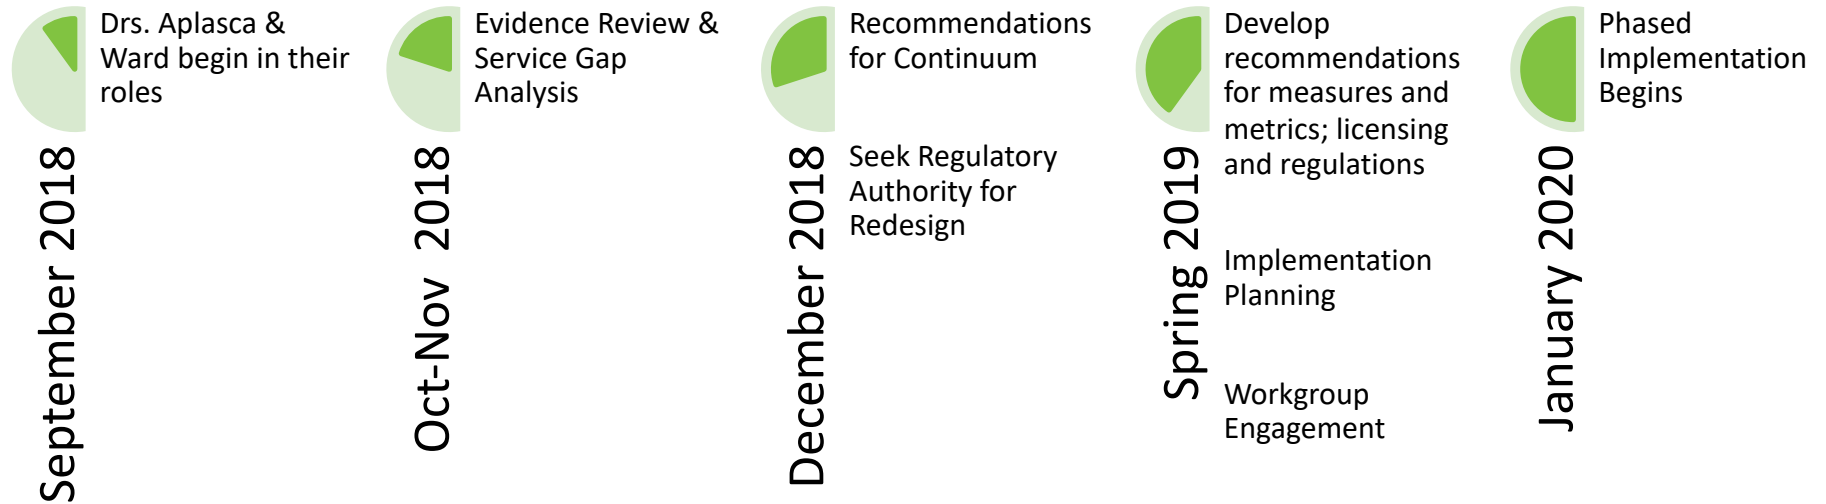

Workgroup Progress

Meetings and Activities

- October 2nd : Initial Meeting and Gaps Activity
- October 23rd: Follow Up Meeting and Bright Spots Identification
- Stakeholder Survey Launch *Anticipated 11/9/18*
- November 27th: Preliminary Survey Results
- December: TBD
- *Ongoing Implementation Partnership*
